

K-Scale 20 | 12"

1241

- ▶ Counter scale with receipt printer
- ▶ PC technology and updateable firmware
- ▶ Unlimited network architecture and number of scales
- ▶ Cash drawer connection (via RJ11 interface)
- ▶ Multiple barcode formats

Features

The retail scales have been specially developed for the trade and trade of butcheries, bakeries, fruit and vegetable stands and supermarkets. The K-Scale PC scales are based on PC technology, with a touch screen monitor for the operator and a VGA monitor for the customer. The program offers a different solution for each mode of operation: counter scales, hanging scales, self-service, etc.

You will receive the counter and hanging models with a graphic-capable receipt, label or receipt/label printer. In addition to the 15-inch touch screen user screen, the unit has a 9-inch VGA screen on the buyer's side (optional 12-inch VGA screen). This is a powerful marketing tool that allows you to play back images and videos. The intelligently designed electronics allow the most common repairs of the scale without violating the calibration.

With single-range scales, up to 2/3 of the maximum load can be tared. The entire weighing range can be tared on multiple-range scales.

- ▶ Counter scale with receipt printer
- ▶ PC technology and updateable firmware
